NUVISTA ENERGY LTD.

Notes to the Unaudited Consolidated Interim Financial Statements For the three and six months ended June 30, 2023, and 2022

1. Corporate information

NuVista Energy Ltd. and its subsidiary (together "NuVista" or the "Company") is a Canadian publicly traded company incorporated in the province of Alberta. The Company is a condensate and natural gas company actively engaged in the development, delineation, and production of condensate and natural gas reserves in the Western Canadian Sedimentary Basin. NuVista's focus is on the scalable and repeatable condensate-rich Montney formation in the Alberta Deep Basin.

The Company's registered office and principal place of business is located at 2500, 525 – 8th Avenue S.W., Calgary, Alberta, Canada, T2P 1G1. NuVista's common shares are traded on the Toronto Stock Exchange ("TSX") under the symbol NVA.

2. Basis of preparation

Statement of compliance

These condensed consolidated interim financial statements (the "financial statements") have been prepared in accordance with International Accounting Standards ("IAS") 34, "Interim Financial Reporting". These financial statements have been prepared following the same accounting policies and methods of computation as the annual financial statements for the year ended December 31, 2022. These financial statements do not include all the information required for annual financial statements and should be read in conjunction with the audited financial statements for the year ended December 31, 2022, which have been prepared in accordance with International Financial Reporting Standards ("IFRS").

Functional and presentation currency

These financial statements are presented in Canadian dollars ("CDN"), which is the Company's functional currency. All tabular amounts are in thousands of CDN dollars, unless otherwise stated.

Use of estimates and judgments

The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingencies, if any, as at the date of the financial statements and the reported amounts of revenue and expenses during the period. Estimates are subject to measurement uncertainty and changes in such estimates in future years could require material change in the financial statements. These underlying assumptions are based on historical experience and other factors that management believes to be reasonable under the circumstances, and are subject to change as new events occur, as more industry experience is acquired, as additional information is obtained as NuVista's operating environment changes. Estimates and underlying assumptions are reviewed on an ongoing basis by management. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in the future periods affected.

These financial statements were approved and authorized for issuance by the Board of Directors on August 8, 2023.

During the six months ended, June 30, 2023, the Company disposed of property for gross proceeds of \$26.0 million (2022 - \$1.3 million), resulting in a gain on disposition of \$15.2 million (2022 - \$1.7 million).

7. Long-term debt

Covenant based credit facility

Effective May 9, 2023, NuVista successfully renegotiated its extendible revolving term credit facility with its existing banking syndicate and has transitioned to a covenant based credit facility. Under the new credit agreement NuVista has in place a \$450 million, covenant based credit facility, (December 31, 2022 - \$440 million extendable revolving term credit facility) which incorporates its existing sustainability linked performance features. There is an accordion feature providing that at any time during the term, on participation of any existing or additional lenders, NuVista can increase the credit facility by \$300 million. The credit facility has a tenor of three years with a current maturity of May 9, 2026, and is secured by a demand debenture. Borrowing under the credit facility may be made by prime loans and bankers' acceptances. These advances bear interest at the bank's prime rate and/or at money market rates plus a borrowing margin. For the six months ended June 30, 2023, borrowing costs averaged 7.5% (June 30, 2022 - 4.1%).

Under the terms of the credit facility, NuVista is subject to the following financial covenants (collectively, the "financial covenants") at the end of each financial quarter:

- Senior Debt to EBITDA ratio will not exceed 3.0:1;
- Total Debt to EBITDA ratio will not exceed 3.5:1; and
- Interest Coverage Ratio will be greater than 3.5:1,

EBITDA is defined as net income (loss) before unrealized gains and losses on financial derivatives, plus interest, taxes and depreciation, depletion, amortization and impairment, and where EBITDA and interest are calculated on a rolling 12-month basis. Total Debt is inclusive of outstanding financial letters of credit whereas Senior Debt excludes the amount of the demand letter of credit facility. Interest Coverage Ratio is defined as EBITDA to Interest expense for the 12-months ending at the end of each reporting period.

At June 30, 2023, the Company was in compliance with all covenants.

NuVista's credit facility is a sustainability-linked loan ("SLL") which allows the Company to link performance on key sustainability themes to its borrowing costs, whereby borrowing rates and standby fees increase or decrease based on established annual sustainability performance targets ("SPTs") related to:

- A reduction of Scope 1 & 2 Greenhouse Gas ("GHG") Intensity;
- Increased spending on asset retirement obligations, over and above the minimum Alberta Energy Regulator established regulations as well as the number of well sites moved through the assessment and remediation process; and
- Gender diversity at the Board of Directors level.

As at June 30, 2023, the Company had drawn \$8.0 million on its credit facility (December 31, 2022 – nil) and had outstanding letters of credit of \$10.9 million (December 31, 2022 - \$7.2 million) which reduce the credit available on this credit facility.

The Company also has a \$30 million unsecured letter of credit facility under Export Development Canada's ("EDC") Account Performance Security Guarantee ("APSG") program. At June 30, 2023, the Company had outstanding letters of credit associated with the APSG of \$23.4 million (December 31, 2022 - \$22.8 million), leaving \$6.6 million of credit available on this facility.

8. Senior unsecured notes

On July 23, 2021, the Company issued \$230.0 million aggregate principal amount of 7.875% senior unsecured notes due July 23, 2026 ("2026 Notes"). The 2026 Notes were issued at \$989.89 expressed as a price per \$1,000.00 principal amount. Interest is payable semi-annually in arrears. The 2026 Notes are fully and unconditionally guaranteed as to the payment of principal and interest, on a senior unsecured basis by the Company. There are no financial covenants for the company to maintain.

The 2026 Notes are non-callable by the Company prior to July 23, 2023. At any time on or after July 23, 2023, the Company may redeem all or part of the 2026 Notes at the redemption prices set forth in the table below plus any accrued and unpaid interest:

12 month period beginning on:	Percentage
July 23, 2023	103.938%
July 23, 2024	101.969%
July 23, 2025 and thereafter	100.000%

If a change of control occurs, each holder of the 2026 Notes will have the right to require the Company to purchase all or any part of that holder's 2026 Notes for an amount in cash equal to 101% of the aggregate principal repurchased plus accrued and unpaid interest.

During the three and six months ended June 30, 2023, NuVista redeemed a total of \$22.4 million and \$55.2 million in aggregate principal of its 2026 Notes through open market repurchases at weighted average prices of \$103.12 and \$102.85, respectively, plus accrued and unpaid interest. The difference between the redemption price and the carrying value was recognized as an early redemption expense within financing costs in the consolidated statement of earnings and comprehensive income.

9. Lease liabilities

The Company has the following future commitments associated with its lease obligations relating to office leases, gas gathering, and gas processing commitments:

⁽¹⁾ Liabilities settled (non-cash) of nil (2022 - \$7.1 million) were funded by payments made directly to NuVista's service providers from the Alberta Site Rehabilitation program ("SRP") with respect to approved abandonment and reclamation expenditures. These amounts have been recorded as "Other

The Company's asset retirement obligations are based on estimated costs to reclaim and abandon ownership interests in condensate and natural gas assets including well sites, gathering systems and processing facilities. At June 30, 2023, the estimated total undiscounted, uninflated amount of cash flows required to settle the asset retirement obligations was \$115.6 million (December 31, 2022 - \$110.7 million), of which 29% is estimated to be incurred within the next 10 years. The Government of Canada benchmark long-term riskfree bond rate of 3.1% (December 31, 2022 - 3.3%) and an inflation rate of 1.7% (December 31, 2022 -2.1%) were used to calculate the net present value of the asset retirement obligations. The inflation rate was determined as the difference between the Government of Canada long-term risk free rate bond rate of 3.1% (December 31, 2022 - 3.3%) and the real rate of interest of 1.39% (December 31, 2022 - 1.19%).

On June 9, 2022, NuVista announced the approval of its normal course issuer bid ("2022 NCIB"). The 2022 NCIB allows NuVista to purchase up to 18,190,261 of its outstanding common shares over a 12-month period, commencing June 14, 2022. During the six months ended June 30, 2023, NuVista repurchased and subsequently cancelled 4,707,661 common shares at a weighted average price of \$11.43/share for a total cost of \$53.8 million. The 2022 NCIB was completed on June 12, 2023.

On June 14, 2023, NuVista announced the renewal of its NCIB ("2023 NCIB"), which allows the Company to purchase up to 16,793,779 of its outstanding common shares over a 12-month period, commencing on June 16, 2023. Subsequent to June 30, 2023, the Company repurchased and subsequently cancelled 676,000 common shares at a weighted average price of \$11.06/share for a total cost of \$7.5 million under the 2023 NCIB.

12. Earnings per share

The following table summarizes the weighted average common shares used in calculating net earnings per share:

	Three months	ended June 30	Six months	ended June 30
(thousands of shares)	2023	2022	2023	2022
Weighted average common shares outstanding				
Basic	217,952	229,595	218,569	228,875
Diluted	224,776	239,405	225,795	238,801

13. Petroleum and natural gas revenues

NuVista produces natural gas, condensate, and NGLs from its assets in the Montney area of Alberta. The Company sells its production pursuant to fixed-price or variable-price physical delivery contracts. The transaction price for variable-price contracts is based on benchmark commodity price, adjusted for quality, location or other factors whereby each component of the pricing formula can be either fixed or variable, depending on the contract terms. Under the contracts, NuVista is required to deliver fixed or variable volumes of commodity to the contract counterparty.

Petroleum and natural gas revenue is recognized when NuVista gives up control of the unit of production at the delivery point agreed to under the terms of the contract. The amount of production revenue recognized is based on the agreed transaction price and the volumes delivered. Any variability in the transaction price relates specifically to NuVista's efforts to transfer production and therefore the resulting revenue is allocated to the production delivered in the period to which the variability relates. NuVista does not have any factors considered to be constraining in the recognition of revenue with variable pricing factors.

NuVista enters into contracts with customers with terms ranging from one month to seven years.

Under its contracts with customers, NuVista is required to deliver volumes of natural gas, condensate and NGLs to agreed upon locations where control over the delivered volumes is transferred to the customer. In instances where the third-party marketer takes title of NuVista's product but uses NuVista's pipeline contract to deliver the product to the end customer, a portion of the natural gas revenue is recognized as natural gas price diversification revenue. Revenue is recognized when control of each unit of product is transferred to the customer with revenue due on the 25th day of the month following delivery.

NuVista's customers are primarily oil and natural gas marketers and partners in joint operations in the oil and natural gas industry. Concentration of credit risk is mitigated by marketing production to several oil and natural gas marketers under customary industry and payment terms. NuVista reviews the credit worthiness and obtains certain financial assurances from customers prior to entering sales contracts. The financial strength of the Company's customers is reviewed on a routine basis.

The following table summarizes petroleum and natural gas revenue by product:

Three months ended June 30 Six months ended June 30

	2023	2022	2023	2022
Natural gas revenue (1)	\$ 76,984	\$ 160,302	\$ 236,861	\$ 279,550

Total petroleum and natural gas revenue	\$ 282,064	\$ 463,273	\$ 672,227	\$ 845,100

⁽¹⁾ Natural gas revenue includes price risk management gains and losses on physical delivery sale contracts. For the three and six months ended June 30, 2023, physical delivery sales contracts resulted in gains of \$5.0 million and \$0.3 million (2022 - losses of \$8.4 million and \$10.7 million, respectively). (2) Includes butane, propane, ethane and sulphur revenue.

A breakdown of natural gas revenue is as follows:

Three months ended June 30 Six months ended June 30

	2023	2022		2023		2022

Total natural gas revenue	\$ 76,984	\$ 160,302	\$	236,861	\$	279,550	

⁽¹⁾ Quarter average AECO 7A monthly index.

Included in the accounts receivable at June 30, 2023 is \$83.2 million (December 31, 2022 - \$141.8 million) of accrued petroleum and natural gas revenue related to deliveries for periods prior to the reporting date. There were no significant adjustments for prior period accrued petroleum and natural gas revenue reflected in the Company's current period.

14. Capital management

The Company manages its capital structure and makes adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets. NuVista is able to change its capital structure by issuing new shares, new debt, repurchasing shares or debt, or changing capital expenditures relative to adjusted funds flow.

The Company has a long-term sustainable net debt target of less than 1.0 times adjusted funds flow annualized for the current quarter in the stress test price environment of US\$ 45/Bbl WTI and US\$ 2.00/ MMBtu NYMEX natural gas. The actual ratio may fluctuate on a quarterly basis above or below targeted levels due to a number of factors including facility outages, commodity prices, capital expenditures, and the timing of acquisitions and dispositions. At June 30, 2023, the Company's net debt was 0.3 times its annualized second guarter adjusted funds flow (December 31, 2022 - 0.2 times). The net debt to annualized current quarter adjusted funds flow ratio represents the time period in years it would take to reduce net debt to nil if no further capital expenditures were incurred and if adjusted funds flow remained consistent.

⁽²⁾ Based on NuVista's historical adjustment of 10-13%.

⁽³⁾ Cost of gas transportation from the transfer of custody sales point to the final sales point.

⁽⁴⁾ Excludes price risk management realized and unrealized gains and losses on financial derivative commodity contracts but includes gains and losses on

To facilitate the management of this ratio, NuVista prepares annual adjusted funds flow and capital expenditure forecasts, which are updated as necessary, and are routinely reviewed and approved by the Board of Directors. The Company manages its capital structure and makes adjustments by continually monitoring its business conditions including: the current economic conditions, the risk characteristics of NuVista's natural gas and condensate assets, the depth of its investment opportunities, current and forecast net debt levels, current and forecast commodity prices, and other factors that influence commodity prices and adjusted funds flow such as quality and basis differentials, royalties, operating costs and transportation costs.

Adjusted funds flow

NuVista considers adjusted funds flow to be a key measure that provides a more complete understanding of the Company's ability to generate cash flow necessary to finance capital expenditures, expenditures on asset retirement obligations, and meet its financial obligations. NuVista has calculated adjusted funds flow based on cash flow provided by operating activities, excluding changes in non-cash working capital and asset retirement expenditures, as management believes the timing of collection, payment, and occurrence is variable and by excluding them from the calculation, management is able to provide a more meaningful performance measure of NuVista's operations on a continuing basis. More specifically, expenditures on asset retirement obligations may vary from period to period depending on the Company's capital programs and the maturity of its operating areas, while environmental remediation recovery relates to an incident that management doesn't expect to occur on a regular basis. The settlement of asset retirement obligations is managed through NuVista's capital budgeting process which considers its available adjusted funds flow.

A reconciliation of adjusted funds flow is presented in the following table:

	Three months ended June 30					Six months ended June 30			
		2023		2022		2023		2022	
Cash provided by operating activities	\$	134,166	\$	227,668	\$	349,387	\$	390,110	
Asset retirement expenditures		(479)		1,184		9,214		6,752	
Change in non-cash working capital		11,795		(29,019)		(5,655)		(7,160)	
Adjusted funds flow (1)	\$	145,482	\$	199,833	\$	352,946	\$	389,702	

⁽¹⁾ Adjusted funds flow as presented does not have any standardized meaning prescribed by IFRS and therefore it may not be comparable with the calculation of similar measures of other entities. Management considers adjusted funds flow to be a capital management measure.

Net debt and total capitalization

Net debt is used by management to provide a more complete understanding of the Company's capital structure and provides a key measure to assess the Company's liquidity. NuVista has calculated net debt based on cash and cash equivalents, accounts receivable and prepaid expenses, other receivable, accounts payable and accrued liabilities, long-term debt (credit facility) and senior unsecured notes and other liabilities. Total market capitalization and net debt to annualized current guarter adjusted funds flow are used by management and the Company's investors in analyzing the Company's balance sheet strength and liquidity.

The following is a summary of total market capitalization, net debt, annualized current guarter adjusted funds flow and net debt to annualized current guarter adjusted funds flow:

Stock options

The Company has established a stock option plan whereby officers and employees may be granted options to purchase common shares. Options granted vest at the rate of one-third per year and expire 2.5 years after the vesting date. The maximum number of stock options currently outstanding and available to be issued as at June 30, 2023 is 4,712,810.

The following continuity table summarizes the stock option activity:

June 30, 2023	December 31, 2022

⁽²⁾ Net debt as presented does not have any standardized meaning prescribed by IFRS and therefore it may not be comparable with the calculation of similar measures of other entities. Management considers net debt to be a capital management measure.

The following table summarizes stock options outstanding and exercisable under the plan at June 30, 2023:

The Company uses the fair value based method for the determination of the share-based compensation costs. The fair value of each option granted during the year was estimated on the date of grant using the Black-Scholes option pricing model.

The weighted average fair value and weighted average assumptions used to fair value the options are as follows:

	June 30, 2023	December 31, 2022
Risk-free interest rate (%)	3.43	3.11
Expected volatility (%)	54	53
Expected life (years)	4.5	4.5
Forfeiture rate (%)	9	9
Fair value at grant date (\$ per option)	5.28	5.93

Share award incentive plan

The Company has a Share Award Incentive Plan ("the Plan") for officers, directors and employees consisting of Restricted Share Awards ("RSA") and Performance Share Awards ("PSA"). The maximum number of common shares reserved for issuance under the Plan is 14,350,000 of which 4,287,932 remain to be issued.

Restricted share awards

The Company has a RSA plan for officers, directors and employees which entitle the holder to receive one common share for each RSA granted upon vesting. RSA grants may vest within three years from the date of grant. Life to date, all RSA grants have had a two-year vesting period.

The fair value of RSAs is determined based on the weighted average trading price of the five days preceding the grant date. This fair value is recognized as share-based compensation expense over the vesting period with a corresponding increase to contributed surplus. The amount of the compensation expense is reduced by an estimated forfeiture rate determined at the date of the grant and updated each period. Upon vesting of the RSAs and settlement in common shares, the previously recognized value in contributed surplus will be recorded as an increase to share capital.

The following table summarizes the change in the number of RSAs:

	June 30, 2023	December 31, 2022
Balance, January 1	845,204	2,308,555
Settled - issuance of shares from treasury	(250,209)	(1,188,970)

Granted	123,851	240,145
Forfeited	(5,535)	(18,049)
Balance, end of period	512,673	845,204

For the six months ended June 30, 2023, the Company withheld 200,638 shares with respect to minimum statutory withholding tax obligations which the Company settled from its cash reserves (December 31, 2022 -496,477 shares). Total withholding tax paid in cash for the six months ended June 30, 2023 was \$2.3 million (December 31, 2022 - \$6.6 million).

Performance share awards

The Company has a PSA plan for officers, directors, and employees. Each PSA entitles the holder to be issued the number of common shares designated in the performance award, multiplied by a payout multiplier ranging from 0 to 2.0x. The payout multiplier for performance-based awards will be determined by our Board based on an assessment of the Company's achievement of predefined corporate performance measures in respect of the applicable period. PSA grants vest three years from the date of grant.

The fair value of PSAs is determined based on the weighted average trading price of the five days preceding the grant date. This fair value is recognized as share-based compensation expense over the vesting period with a corresponding increase to contributed surplus. The amount of the compensation expense is reduced by an estimated forfeiture rate determined at the date of the grant and updated each period. Upon vesting of the PSAs and settlement in common shares, the previously recognized value in contributed surplus will be recorded as an increase to share capital.

The following table summarizes the change in the number of PSAs:

	June 30, 2023	December 31, 2022

⁽¹⁾ Awards granted on the vest date due to a performance factor increase to 1.48x for the six months ended June 30, 2023. (December 31, 2022 - 1.23x)

For the six months ended June 30, 2023, the Company withheld 818,156 shares (December 31, 2022 -249,078 shares) with respect to minimum statutory withholding tax obligations which the Company settled from its cash reserves. Total withholding tax paid in cash for the six months ended June 30, 2023 was \$9.2 million (December 31, 2022 - \$3.3 million).

Cash award incentive plan

The Company has a Cash Award Incentive Plan ("the Plan") consisting of Director Deferred Share Units ("DSU") and Restricted Stock Units ("RSU") for non-managment directors, and Performance Share Units ("PSU") for officers and employees.

Director deferred share units

The Company's DSU incentive plan provides compensation to non-management directors. Each DSU entitles the holder to receive cash equal to the trading price of the equivalent number of shares of the Company. All DSUs granted vest and become payable upon retirement of the director.

The compensation expense is calculated using the fair value method based on the trading price of the Company's shares at the end of each reporting period.

The following table summarizes the change in the number of DSUs:

	June 30, 2023	December 31, 2022
Balance, January 1	1,231,973	1,147,930
Granted	42,136	84,043
Balance, end of period	1,274,109	1,231,973

The following table summarizes the change in compensation liability relating to DSUs:

Balance, January 1	\$ 15,375	\$ 7,990
Change in accrued compensation liabilities	(1,844)	7,385
Balance, end of period	\$ 13,531	\$ 15,375

The compensation liability was calculated using share prices at June 30, 2023 and December 31, 2022, of \$10.62 and \$12.48, respectively.

Performance share units

The Company's PSU incentive plan provides compensation to officers and employees. Each PSU entitles the holder to receive cash equal to the trading price of the equivalent number of shares of the Company at the time of grant, multiplied by a payout multiplier ranging from 0 to 2.0x. The payout multiplier for performancebased awards will be determined by our Board based on an assessment of the Company's achievement of predefined corporate performance measures in respect of the applicable period, using the same performance assessment metrics as are used in the PSA plan.

The following table summarizes the change in the number of PSUs:

16. Risk management activities

(a) Financial instruments

The Company's financial instruments recognized on the statement of financial position consists of cash and cash equivalents, accounts receivable and prepaid expenses, financial derivative contracts, accounts payable and accrued liabilities, other liabilities, long-term debt and senior unsecured notes. The carrying value of the long-term debt approximates its fair value as it bears interest at market rates. Except for the financial derivative contracts and compensation liabilities, which are recorded at fair value, carrying values reflect the current fair value of the Company's financial instruments due to their short-term maturities. The estimated fair values of recognized financial instruments have been determined based on quoted market prices when available, or third-party models and valuation methodologies that use observable market data.

The Company classifies fair value measurements according to the following hierarchy based on the amount of observable inputs used to value the instrument.

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

- Level 2 Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level
 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on
 inputs, including quoted forward prices for commodities, time value and volatility factors, which can be
 substantially observed or corroborated in the marketplace.
- Level 3 Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The Company's cash and cash equivalents are classified as Level 1 and financial derivative contracts as Level 2. The Company uses third party models and valuation methodologies to determine the fair value of financial derivative contracts. Assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the placement within the fair value hierarchy level.
